Purpose of this Month of Bugs is a demonstration of real state with security in search engines, which are the most popular sites in Internet. To let users of search engines and web community as a whole to understand all risks, which search engines bring to them. And also to draw attention of search enginesGÇÖ owners to security issues of their sites.

During the month everyday will be publish vulnerabilities in most popular search engines of the world. Cross-Site Scripting vulnerabilities in particular. Everyday will be publish vulnerabilities in different engines (minimum one publication at a time, but there will be bonus publications also).
