In ultra-exciting news – thanks to my Leverhulme Prize – I am very pleased to be able to be able to say that my book, *Close Reading with Computers: Textual Scholarship, Computational Formalism, and David Mitchell's Cloud Atlas*, is now openly accessible (gold OA under a CC BY-SA 4.0 license) at Stanford University Press! It will soon be in the OAPEN Library and on the Stanford site, but for now it's [freely available in BIROn](#). Final version. Citeable. Free. (And no, this isn't just a temporary thing like loads of “coronavirus OA”; it's forever.)
